

## LOOKING FOR Dogs with ITP

**Can cytokine levels direct treatment?**

### **Purpose of Study:**

- Determine if cytokine levels are an accurate blood marker to know when to stop treatment and if relapse is likely.

### **Eligible Dogs:**

- Diagnosed with primary immune-mediated thrombocytopenia (pITP)
- Has not started treatment
- Does not also have cancer

### **Study Requirements:**

- Blood collection at enrollment
- Blood collection at recheck appointments on weeks 1, 2, 3, and 4.
- Blood collection every 4 weeks until in remission.
- Blood collection every 12 weeks until end of study or relapse.

### **Benefits:**

- Free recheck CBC's (complete blood count)
- Help science!

### **For more information or to enroll:**
