

DOES YOUR DOG HAVE BLASTOMYCOSIS?

Purpose of Study:

We want to know if dogs who have blastomycosis produce different amounts of antigen dependent on the concentration of their urine.

Eligible Dogs:

Any dog diagnosed with blastomycosis in the past 90 days.
May be on treatment.

Benefits:

Help science and dogs!

Study Requirements:

Collect 3 urine samples any time during 1 day.
Mail in, drop off, or arrange for pickup of (local) samples.
No cost to you!

For more information or to enroll:

Please email Amy at clinicalstudies@vetmed.wisc.edu or call 608-890-3484.

We can do everything by mail so you can live anywhere in the continental United States.
